Professional Summary

Senior Data Analyst **with 5+ years** of experience delivering data-driven insights through **advanced SQL, Python, and business intelligence solutions** across operations, finance, product, and risk teams. Expertise in embedded analytics, ad-hoc analysis, dashboard ownership, KPI development, customer journey analysis, churn analysis, cohort analysis, retention analytics, and business performance monitoring. Proven ability to transform ambiguous business questions into actionable recommendations using modern data stacks, cloud data warehouses, and AI-assisted analytics. AI enthusiast building websites, web applications, and SaaS products while leveraging **Generative AI and LLM-powered workflows** to accelerate analysis, dashboarding, automation, and communication. Adept at **partnering with non-technical stakeholders to drive strategic decisions** through scalable reporting, statistical analysis, hypothesis testing, and executive-ready insights.

Core Competencies

Analytics & Business Intelligence:

Advanced SQL, Complex Query Development, Embedded Analytics, Ad-Hoc Analysis, Business Analytics, Customer Journey Analysis, Churn Analysis, Cohort Analysis, Retention Analytics, Funnel Analysis, Root Cause Analysis, KPI Development, Business Performance Monitoring, Exploratory Data Analysis, Decision Support, Recommendation Driven Analytics

Programming & Statistics:

Python, Pandas, NumPy, Statistical Analysis, Hypothesis Testing, Forecasting, Trend Analysis, Data Automation, Predictive Analytics, Data Validation

Modern Data Stack:

dbt, Cloud Data Warehouses, Snowflake, BigQuery, Azure SQL, ETL/ELT, Data Modeling, Data Transformation, Data Pipelines, Schema Design, Data Governance

BI & Visualization:

Tableau, Power BI, Looker, Sigma, Dashboard Development, Dashboard Ownership, Executive Reporting, Interactive Dashboards, Self-Service Analytics

AI & Automation: Generative AI, AI-Assisted Analytics, AI-Powered Business Intelligence, LLM Workflows, Prompt Engineering, Intelligent Automation, AI-Driven Dashboarding

Collaboration:

Cross-Functional Partnership, Stakeholder Management, Non-Technical Communication, Executive Presentations, Requirements Gathering, Data Storytelling

Professional Experience

STATE FARM – SENIOR DATA ANALYST

Nov 2024 – Present

Dallas, TX (Remote)

- Serve as an embedded analytical partner for operations, finance, and product teams, translating complex business questions into data-driven recommendations and strategic decisions.
- Design, own, and maintain executive dashboards and KPI frameworks using Advanced SQL, Power BI, Tableau, and cloud data platforms, establishing authoritative reporting standards.
- Perform rapid ad-hoc SQL pulls and deep-dive analyses on operational performance, customer behavior, cohorts, and business trends to support day-to-day and strategic initiatives.
- Conduct customer journey analysis, retention analysis, root cause investigations, and business performance monitoring to identify optimization opportunities and improve decision-making.
- Automate reporting pipelines and dashboard workflows, reducing manual effort by 70% while improving reporting accuracy and scalability.
- Utilize Python for statistical analysis, hypothesis testing, automation, and advanced analytics beyond SQL aggregations.

- Implement robust data validation, business rules, and quality checks across reporting pipelines to improve enterprise data reliability.
- Leverage Generative AI and LLM powered workflows to accelerate SQL development, dashboard creation, documentation, and analytical productivity.
- Communicate technical insights effectively to executive and non-technical stakeholders through actionable recommendations and data storytelling.

CITIBANK – DATA ANALYST

Jan 2021 – Aug 2023

Bangalore, India (Tampa, FL)

- Partnered with risk, finance, compliance, and operations teams to deliver embedded analytics and decision support using advanced SQL, Python, and BI solutions.
- Performed deep-dive investigations into fraud trends, customer behavior, operational anomalies, and risk exposure through exploratory analysis and statistical techniques.
- Conducted hypothesis testing and Python-based analytics to validate business assumptions and improve strategic planning.
- Built automated dashboards and KPI reporting frameworks using SQL and Power BI, reducing reporting turnaround by 55%.
- Developed data quality frameworks and validation layers that resolved 100+ critical issues while improving reporting accuracy.
- Executed ad-hoc analyses and forecasting models supporting compliance, underwriting, finance, and business operations, contributing to significant cost savings and process improvements.
- Presented executive-ready insights and recommendations to non-technical stakeholders while documenting KPI definitions and reporting standards.

NEW10S ONLINE SHOPPING PVT LTD – DATA ANALYST

Jun 2020 – Jan 2021

Hyderabad, India

- Developed SQL-based dashboards and Power BI reports to analyze customer journeys, acquisition funnels, cohort behavior, churn, retention, conversion performance, and customer lifetime value, enabling data-driven marketing and product decisions.
- Conducted ad-hoc analysis, exploratory data analysis, and behavioral segmentation using Advanced SQL and Python to optimize funnels, improve conversions, and generate approximately **\$2M in incremental monthly revenue**.
- Built next-best-action and retention analytics by integrating transactional and engagement data, leveraging statistical analysis and trend modeling to support pricing, promotion, and customer growth strategies.
- Automated reporting pipelines and implemented data validation, quality checks, and KPI monitoring frameworks, improving reporting reliability to **98%+** while partnering with cross-functional stakeholders to deliver executive-ready dashboards and actionable business recommendations using AI-assisted workflows.

Education

- **Master's in Information Systems**, DePaul University, Chicago, IL - **GPA: 3.91**

Minor:	Data	Analytics	and	Project	Management
	DePaul				
- **Bachelor of Engineering in Electronics and Communication Engineering**, SVCN, JNTUA
